### NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (PCT Rule 71.1)

Date of mailing  
(day/month/year) 24.02.2005

Applicant's or agent's file reference  
CFE/040015

### IMPORTANT NOTIFICATION

International application No.  
PCT/EP2004/004017

International filing date (day/month/year)  
25.03.2004

Priority date (day/month/year)  
28.03.2003

Applicant  
NORTEL NETWORKS LIMITED et al

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

**INTERNATIONAL PRELIMINARY REPORT  
ON PATENTABILITY**

 International application No.  
PCT/EP2004/004017

**Box No. I Basis of the report**

1. With regard to the **language**, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.
- ☐ This report is based on translations from the original language into the following language, which is the language of a translation furnished for the purposes of:
- ☐ international search (under Rules 12.3 and 23.1(b))
  - ☐ publication of the international application (under Rule 12.4)
  - ☐ international preliminary examination (under Rules 55.2 and/or 55.3)
2. With regard to the **elements\*** of the international application, this report is based on *(replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report)*:

**Description, Pages**

1-7 as originally filed

**Claims, Numbers**

1-10 as originally filed

**Drawings, Sheets**

1/1 as originally filed

- ☐ a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing
3. ☐ The amendments have resulted in the cancellation of:
- ☐ the description, pages
  - ☐ the claims, Nos.
  - ☐ the drawings, sheets/figs
  - ☐ the sequence listing (*specify*):
  - ☐ any table(s) related to sequence listing (*specify*):
4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
- ☐ the description, pages
  - ☐ the claims, Nos.
  - ☐ the drawings, sheets/figs
  - ☐ the sequence listing (*specify*):
  - ☐ any table(s) related to sequence listing (*specify*):

\* If item 4 applies, some or all of these sheets may be marked "superseded."

**INTERNATIONAL PRELIMINARY REPORT  
ON PATENTABILITY**

International application No.  
PCT/EP2004/004017

**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

---

1. Statement

Novelty (N)	Yes: Claims	1-10
	No: Claims	
Inventive step (IS)	Yes: Claims	1-10
	No: Claims	
Industrial applicability (IA)	Yes: Claims	1-10
	No: Claims	

2. Citations and explanations (Rule 70.7):

**see separate sheet**

Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

The present invention relates to a method (**claim 1**) for notifying wireless stations for which a transmission of a specific service is intended, and the corresponding network equipment (**claim 5**) and wireless station (**claim 8**).

According to the prior art method, eg. given by the **3GPP technical specification TS 25.331**, which discloses the closest state of the art (cited on page 1 of the description), the start of a transmission is announced to wireless stations by paging said wireless stations. However, **no indication of the service** is incorporated in the paging message. So all paged wireless stations read the incoming transmission, while only a few of the wireless stations may have a subscription with the particular service. Hence, the problem to be solved is to define a more selective method for notifying wireless stations for which a transmission of a specific service is intended.

This problem is solved by transmitting a group paging message **incorporating a hashed data string including a unique identifier of the service** to the wireless stations. By including an indication of the service in the paging message only the concerned wireless stations will read the transmission.

Such an inclusion of a short representation of a unique service identifier into a group paging message, as claimed, is neither taught, nor rendered obvious, alone or in combination, by the available prior art documents.

In document **D1 = WO 97/22217** the paging message is sent to an **individual** wireless station and includes an indication of a pre-registered service set of **said** station. According to **D2 = WO 03/015440**, only the wireless stations **concerned** with a specific service are paged, ie. the paging message itself does not incorporate an indication of the service.

The particular method of claim 1, and respective network equipment (claim 5) and wireless station (claim 8), are therefore novel and considered to involve an inventive step, see Articles 33 (2) (3) PCT. The subject-matter of said claims is also industrially applicable.

The dependent claims 2 to 4, 6, 7, 9 and 10 relate to further implementing details of the method defined by claim 1, and respective network equipment (claim 5) and wireless
